

Lesson 8 : To view saved Shared Preference file follow the step by step screen shot procedure.

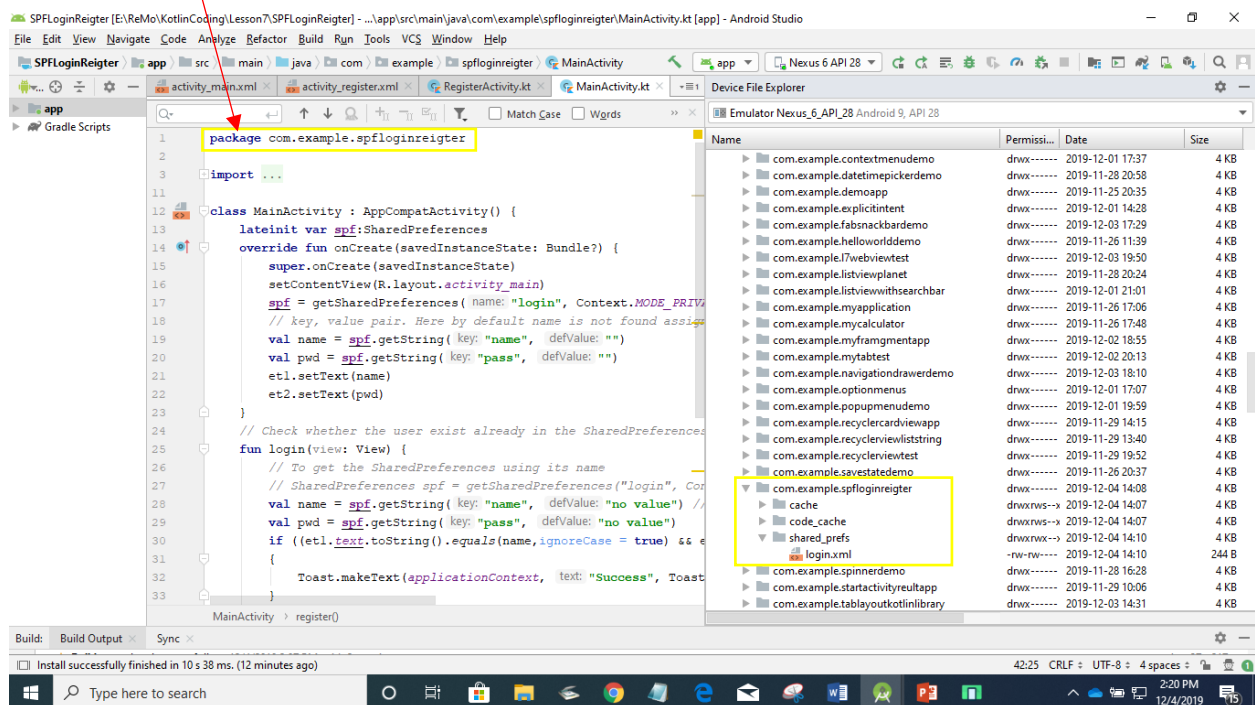

Step 1 : View → Tool Windows → Device File Explorer

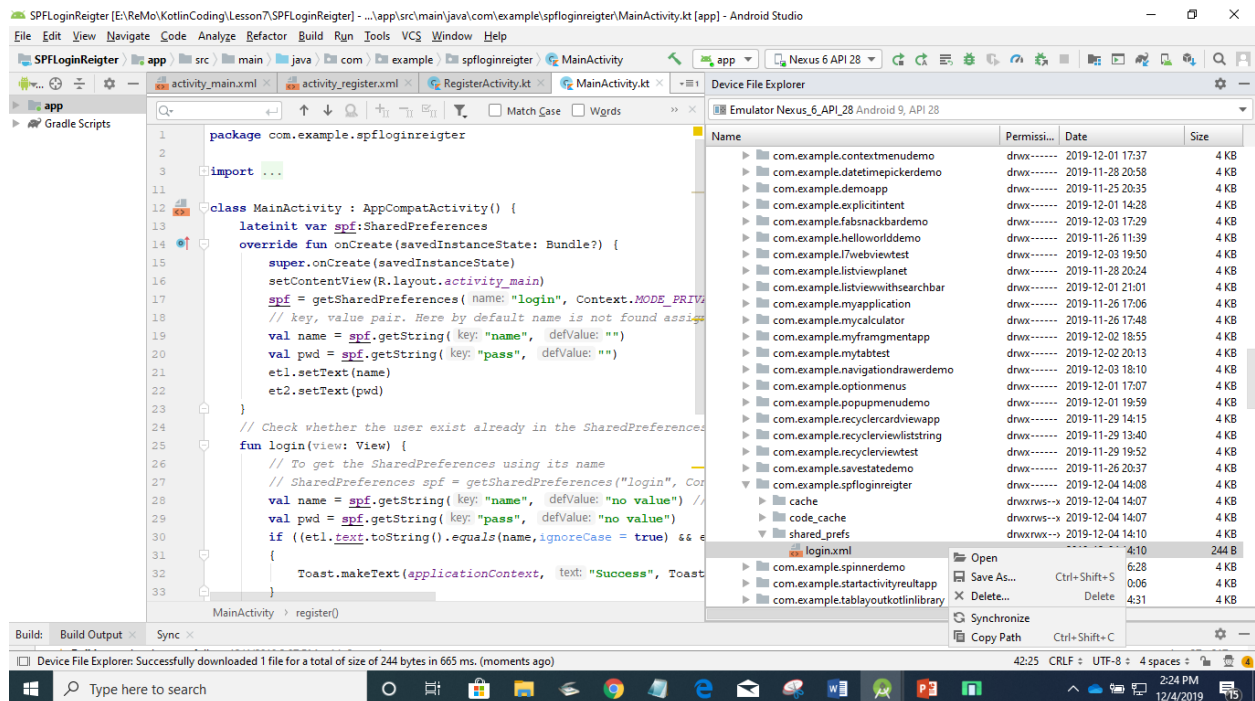

Step 2 : Select the right Emulator you installed the app. Then select data→data

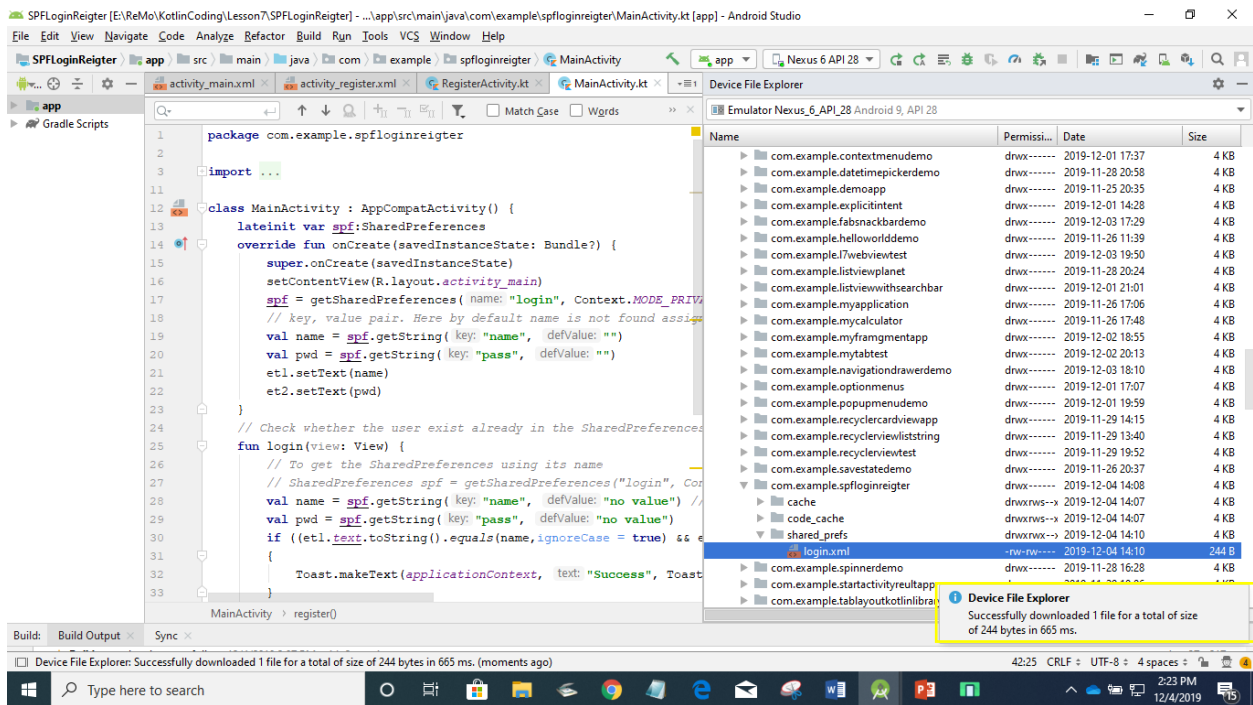

Step 3 : Find the package of your app from data→data. My package name is com.example.spfloginreigter. Click on your package→ Shared_pref→login.xml

Step 4: If you want save the file into your device, right click on your login.xml and save it on your PC.

Step 5: After saving a file, you will get the highlighted confirmation.

Step 6 : Open your saved resource file using text editor, the file looks as below.

```
<?xml version='1.0' encoding='utf-8' standalone='yes' ?>
```

```
<map>
```

```
    <string name="pass">reuka</string>
```

```
    <string name="phone">6413456789</string>
```

```
    <string name="name">Renuka</string>
```

```
    <string name="email">test@gmail.com</string>
```

```
</map>
```
